

BUTT ROLL GUILLOTINE

Makes recycling easier!

- ✚ The butt rolls are loaded into the infeed hopper, from where they are automatically fed to the splitting section.
- ✚ The paper is cut down to the core.
- ✚ The paper and the core are ejected to a collecting table where they are easily separated by the operator. The cores can now be reused.

Technical data:

Capacity: 4-5 rolls per minute
Butt roll diameter: 110-260 mm
Length of butt rolls: 400-1600 mm
